

MIDLAND

EcoPATCH®

Permanent Pothole and Blacktop Repair

PREMIUM GRADE

An eco-friendly product from Midland Asphalt Materials Inc.

The green road forward

USA

JUNE 2009

Following several successful field trials all around New York State Midland Asphalt materials Inc (MAM INC) launches EcoPatch® onto the US market <http://www.midlandasphalt.com/products-processes/ecopatch/>. A mobile bagging facility in NY got the 50lb bag option off to a flying start BUT the sales of the unique Bulk Load option is growing at a remarkable rate. MAM INC currently holds the License for the Macfix® Cold Asphalt in 25 States of America and has now started a rolling out programme into neighbouring States.

EcoPatch® Cold asphalt stock pile in used by Oswego County Highways, NY

EcoPatch® is an environmentally friendly alternative to repairing potholes in roads and driveways using proprietary technology. This mixture of aggregate and special binder is perfect for filling potholes and other pavement imperfections. Using the special Macfix® additive, EcoPatch® is revolutionary Asphalt patching product that helps not only maintain road surfaces but can also prevent future problems. While using EcoPatch® you are sure to not only extend your pavement surface life, but also limit impact on our eco-system. EcoPatch® is just another step in our *Green Road Forward*.
