

RED DOT T/A MACISMO SOUTH AFRICA

Provisional License deal for MACFIX® Cold Asphalt Technology

Macismo International Limited has agreed a provisional Licence for the territory of the Western Cape valid until the end of May 2008; negotiations are ongoing and it is fully expected that the licence itself will be implemented by the end of March 2008.

In the meantime trials with MACFIX® cold Asphalt in the Western Cape and Gauteng Provinces continue to perform well with positive feedback from the Municipality Highway Representatives.

During September 2007 mass production runs using MACFIX® additive were completed successfully which enabled the end product to be trialled and observed over long periods of time including the heat of the summer.

Positive news and feedback is being returned from the clients and operatives who have observed the performance and handling of the MACFIX® cold asphalt.
