

UK LICENSEE

License extended to 7 years for MACFIX® Technology

Macismo International Limited is pleased to announce that as a result of Positive feedback from the successful trials of COLPATCH with Nationwide customers since May 2005 Colas Ltd decided to extend the period of the License for the MACFIX® technology used in the COLPATCH mix.

One of Colas's clients, the Road services manager for Aberdeen City Council, Mike Cheyne commented:

"We are looking for alternatives to an earlier material that needed dry conditions for laying and lots of compacting. We took up the offer to trial COLPATCH and had it for over a year using it in Pot Holes in all kinds of weather. The long Shelf life of COLPATCH, it's availability in 25kg bags or Bulk open loads and the price all make it an attractive option. COLPATCH works well and we are certainly happy to continue using it."

Sommerville Wright the Products Business Manager for COLAS states in a testimonial:

"We have received similar feedback from a number of our nationwide customers which has convinced us that Colpatch has an important place in our product range; accordingly we decided to renegotiate the period of the MACFIX® license to 7years.

The work that has been carried out has proved to us that Colpatch has a place in the market which offers our customers a product that provides a sustainable solution to an increasing problem."
